

Our range of media furniture in a contemporary handleless design provides an ideal solution for the modern home where open plan design brings the kitchen and living area together.

This furniture is beautifully created to conceal all the items associated with a homemediacentre. The cleverly designed back panel eliminates all the clutter created by numerous cables whilst control of all devices can be achieved from your existing remote even when the cabinet doors are closed by the use of an intelligent infrared sensor.

Our furniture is available in 32 slab door designs and complementary cabinet finishes enabling you to co-ordinate or mix and match a style that suits you. Many of our finishes can also be used to beautifully match our kitchen range.

All our cabinets are handbuilt to order in the UK and benefit from a five year guarantee.

'De-clutter your living space'

The Media range is a 'modular' furniture system that provides all the elements you need to organise your available space and present a flexible stylish storage solution for your media equipment. Illustrated below are the key components that go to make up the range.

- | | |
|--|---|
| 1 Baseboard (to suit Floor Standing back panel) | 8 Continuous top |
| 2 Plinth Support (to suit Wall Hung back panel) | 9 Wall Cabinet |
| 3 Base Cabinet with fold down door | 10 Flat screen TV (Not supplied) |
| 4 Base Cabinet with built in electric fire | 11 Clip in television brackets |
| 5 Base Cabinet with pull out drawer | 12 Wall CD Cabinet |
| 6 Recessed Handle Rail in Aluminium including end caps | 13 Clip in shelving and CD racks |
| 7 Infrared Sensor Repeater Kit | 14 Back Panel floor standing or wall hung |

Cabinet features include:

Cleverly designed wall panel system

Conceals cables from your TV and media devices in a hidden channel for a fully fitted look. Made up of separate panels which interlock together with horizontal aluminium trims.

Base cabinet for technology storage

Beautifully conceals all of your audio, media and gaming devices in a specially designed cabinet. A fold down mirror backed door enables operation of optional infrared sensor.

Handleless Opening

All cabinets are handleless with an integral aluminium trim and offer built-in soft closing systems fitted to doors and drawers with full extension for easy access.

Modular Design

A range of cabinet widths offer flexible design. Rigid glue and dowelled cabinets are supplied using 19mm MFC with matching backs.

Base cabinet with integrated electric fire

A contemporary electric convection fire with integral flame effect provides a heat source and makes an attractive focal point.

Intelligent Infrared Sensor

A discreet sensor gives you full control of all your media devices with your existing remotes enabling operation even when the door is closed.

Accessories

A range of glass and aluminium shelf accessories which interlock into the horizontal aluminium trims provide an attractive practical design option.

Recessed Handles

Wall cabinets are supplied with a discreet built-in aluminium handle rail to allow easy opening and creates an attractive handleless effect.

Two design options to choose between

Floor Standing Style

Low level fitted cabinets mounted on a baseboard create a floor standing contemporary style.

Wall Hung Style

Wall hung cabinets create a floating look leaving floors clear. An optional plinth can be fitted if necessary.

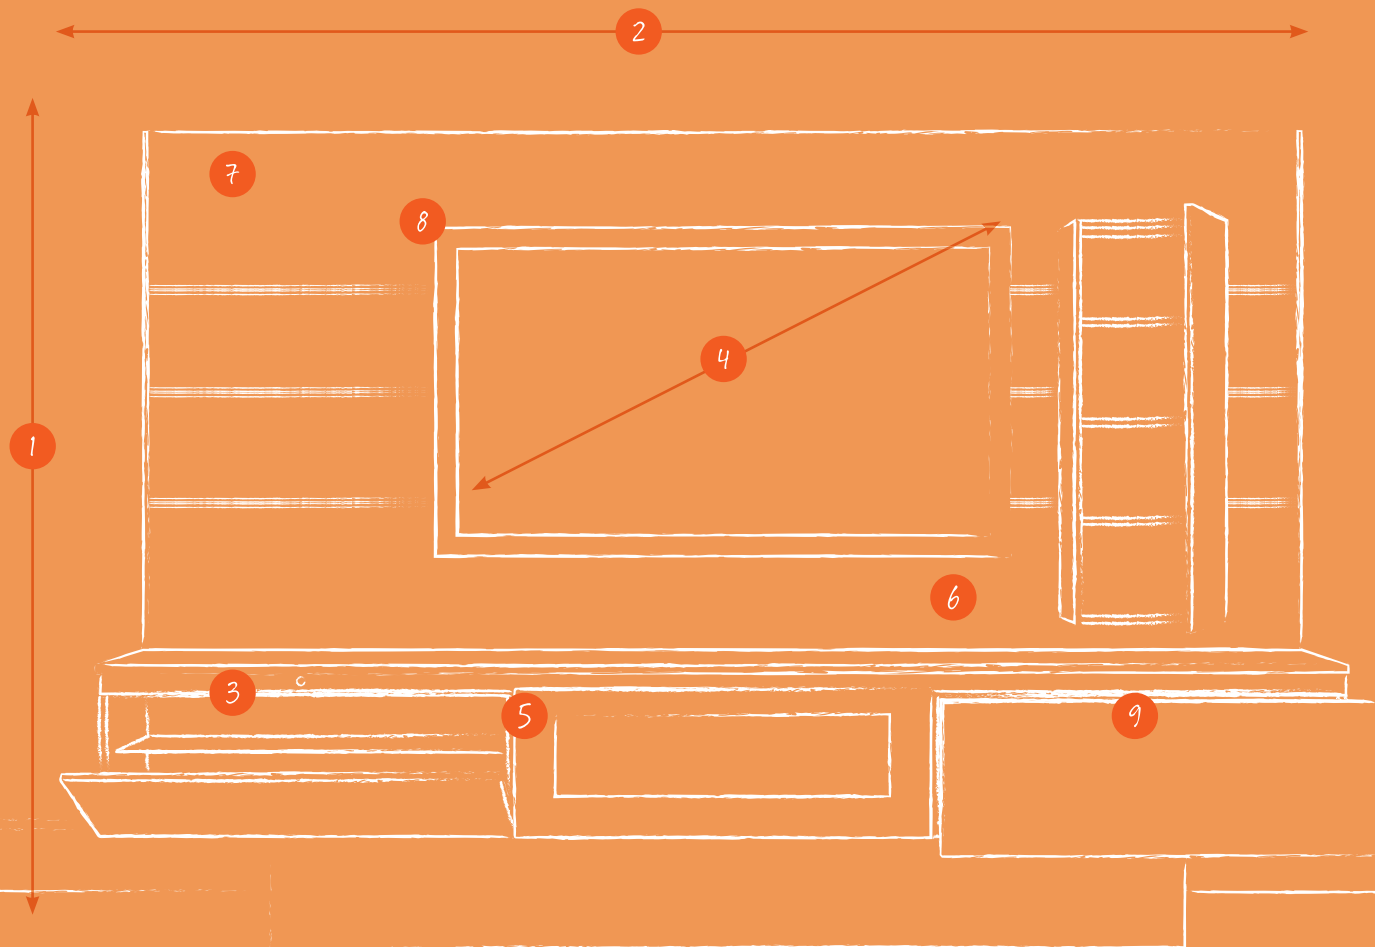

Design features include

- Two design styles Floor Standing or Wall Hung
- Clever wall panel system conceals all cables for a fully fitted look
- Horizontal aluminium trims interlock the back panels together and also provide support for shelf accessories and our specially designed TV support brackets
- Base cabinets for technology storage conceals all your audio/visual media and gaming devices
- Discreet infrared sensor gives you full control of all your media devices even when the doors are closed
- Base cabinet with integrated electric fire provides a heat source and an attractive focal point

Cabinet features include

- Five year guarantee
- Traditional glue and dowel construction supplied fully assembled
- Rigid 19mm MFC cabinets with 8mm matching backs
- Handleless door design provided by recessed handle trim in aluminium
- All cabinets have built in soft closing systems fitted to doors and drawers
- All cabinets are made to order and hand built in the UK
- Wall Cabinets supplied with discreet built-in handles

Planning your space

- 1 Measure the wall you intend to use and check there is a suitable power supply and access to an aerial, cable or satellite connection
- 2 Decide on the overall desired width for your media furniture to work within
- 3 Consider how much you wish to store and how many devices you wish to incorporate
- 4 Be sure you know the size of your TV
- 5 Choose your base cabinet configuration from this guide combining fold down door fronts and drawer units as required
- 6 Select a continuous top to measure the same as your combined base cabinets
- 7 Choose a back panel width to suit your chosen design style - floor or wall hung. For guidance please refer to the appropriate product guide pages
- 8 Be sure that your TV will fit suitably within the back panel dimensions and decide on your mounting bracket. Choose our TV bracket from accessories or re-use an existing one
- 9 Using the design that you have put together choose your cabinet and door finishes to suit your taste or budget from the colour finish pages of this product guide

You should also consider the following:

Do you need an infrared sensor repeater to operate your hardware behind the closed cabinet door?

Would you like to include wall units, shelves or perhaps a child safety lock?

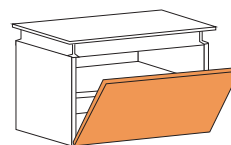

Enhance your design with discreet back panel LED lighting

Once you have planned your layout choose your cabinet and door finishes to suit your design from the colour finish pages of this guide.

You can order swatch samples of your colour finishes from our retailers to view prior to placing your order.

Pricing is shown in three columns to the right of the product guide pages. Prices vary depending on your choice of matt or gloss door finish.

1. Select your door finish

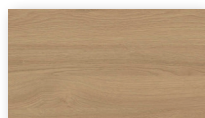

Choosing your door finish is important. Colour match to your desired kitchen finish or choose a contrast to suit your taste.

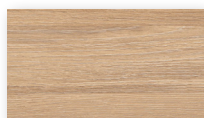

Price Group One

Matt Woodgrain

Technical Information

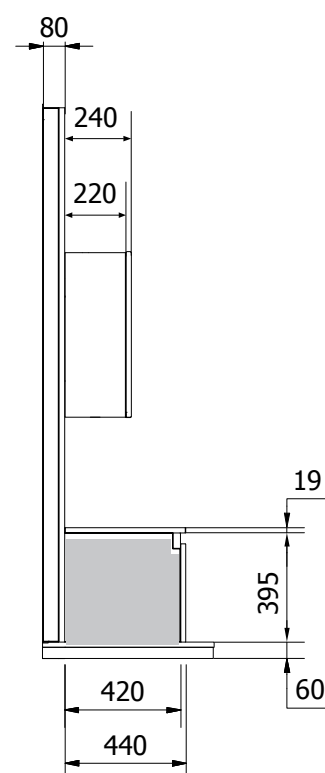

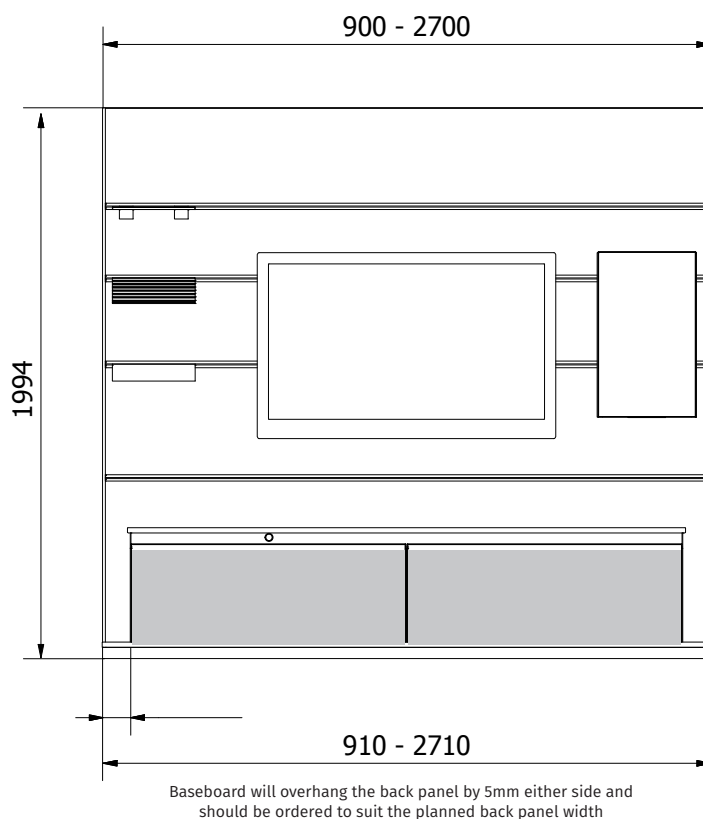

Wall Hung Style

With this style we recommend back panels are ordered the same width as the planned cabinet width

Floor Standing Style

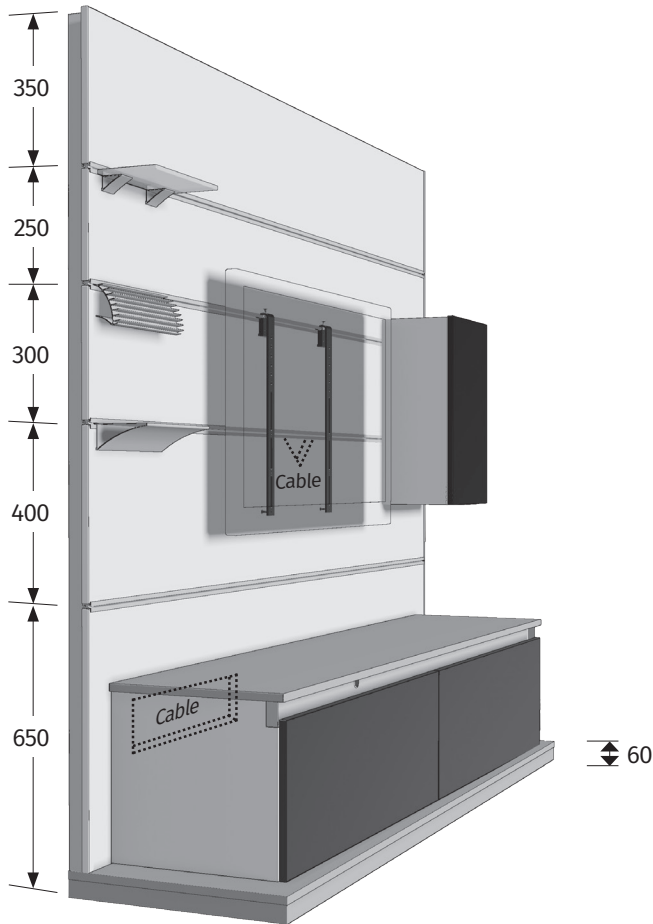

With this style we recommend baseboards and back panels are ordered 200mm wider than the planned cabinet width

Technical Information

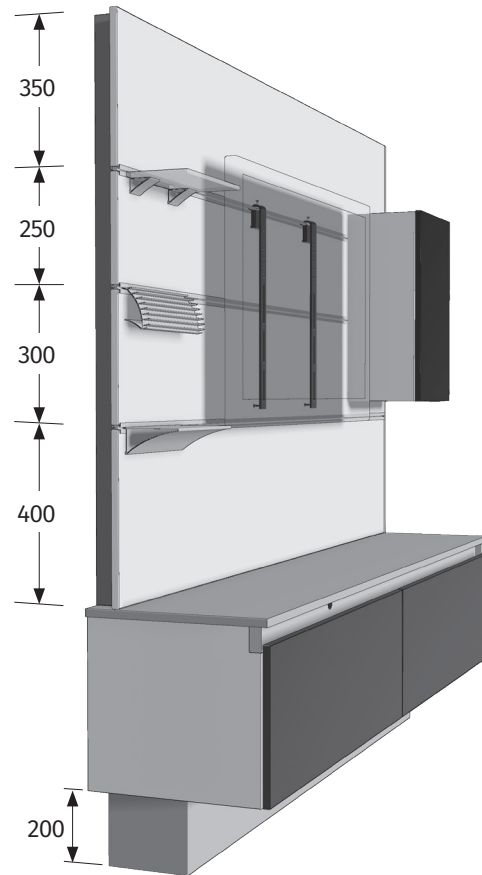

Back panel fitting simply requires a pair of wall mounting rails fixing to the wall with suitable fixings. Fasten the bottom panel to the rails through pre-drilled holes and push on a horizontal aluminium divider strip then repeat the process for all the other panels. Panels can be easily notched out or drilled for cabling prior to assembly.

Floor Standing Style

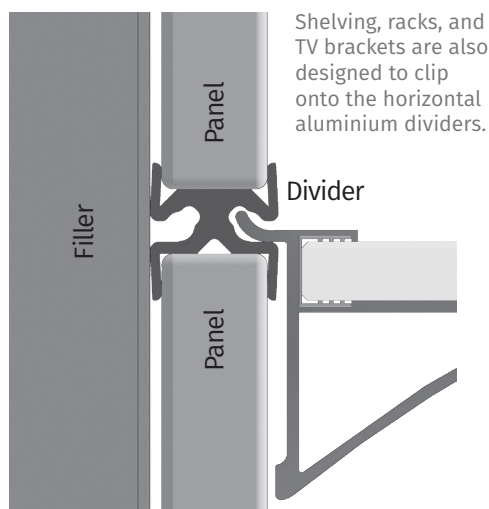

Panels can be installed in any order to suit cable access or TV mounting heights with the exception of the 650mm 'Floor Standing Style' bottom panel. Cut out hole in back panel to allow cable routing.

Wall Hung Style

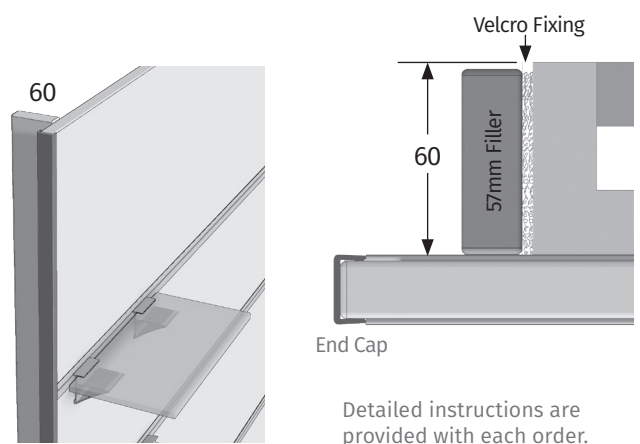

Conventional TV wall brackets can be used but must be bolted securely through the back panel. Heavy duty wall fixing brackets are supplied with all wall hung cabinets. If wall strength fixing is weak please order optional plinth support.

Please note: Ensure the divider is installed right way up

Final assembly is simply finished with an aluminium vertical end cap and panel matching 57mm filler.

Detailed instructions are provided with each order.
